

Basic Coal Sampling – Coal Stockpiles

Conduct basic coal sampling on stockpiles in accordance with accepted sampling principles

Why This Training Matters

Ensures Representative Data

Maintains Sample Integrity

Prioritises Operational Safety

Precision at the Source: Sampling for Success.

Key Learning Objectives

- ✓ **Identify sampling locations and increments** on stockpiles using prescribed workplace procedures.
- ✓ **Work according to a Sampling Plan** as the sampling activity must be a planned event – follow given plan
- ✓ **Collect increments correctly** using approved tools and techniques to form a gross sample.
- ✓ **Handle and label samples correctly** to prevent contamination, loss, or segregation.
- ✓ **Confirm sample mass and condition** meet stated requirements before sample preparation or dispatch.

Who Should Attend?

- ✓ **Entry-level samplers**
- ✓ **Sampling supervisors**
- ✓ **Field operators involved in coal stockpile sampling**
- ✓ **Plant and logistics personnel required to collect routine samples**
- ✓ **Trainees working under an established sampling plan and supervision**
